

Agreement for Work Authorization at NIA

Minors under the age of 18 years of age must have a parent or guardian's permission to participate in the Summer Internship Program at the National Institute on Aging. This program will provide opportunities for developmental training and practical research experience in a variety of disciplines related to biomedical research, medical library research and related fields.

Working in a research laboratory may include the use of hazardous chemicals. Many of these chemicals are no more dangerous than common household cleaning products. However, some may present certain hazards. Every summer intern will receive a minimum of 5 hours of safety training. Each individual will be evaluated on their knowledge and understanding of safe work practices. Additional training is provided based on specific tasks to be performed. In addition, each student will be given their own personal protective equipment to be used whenever working with hazardous materials. If you want additional information concerning laboratory safety, please contact the NIA IRP Safety Manager, Rhonda Walther at 410-558-8636.

I give my permission for _____ to work at the
National Institute on Aging.

Student's Name

Signature of Parent/Legal Guardian
